DUMMERSTON.

The usual practice among the farmers in cutting corn, is to bind together from sixty to eighty stalks of corn and call it a "shock," sometimes a "pike," but commonly a "stook." In the item of news given to the reporter and printed last week, the bundle of stalks was called a pike, he called it a stook and the printer a stalk. Which is right? A shock, or stook, is a bundle of sheaves, 10 or 12 in number, of oats, wheat or rye, but corn is not included in the definition. It matters very little which word is correct, but in the item of cutting corn, as printed last week, if it takes two men one minute to cut a stalk of corn how long would it take them to cut a shock and how many days would it require to cut one acre?

Dr. Miles' New Heart Cure Victorious.

SAMUEL O. STONE.
Grass Lake, Mich., Dec. 28, 1904.
I have been troubled with heart disease 15 years or more. Most of the time I was so bad it was not safe for me to go out alone as dizzy spells would cause falling. I had severe palpitation, shortness of breath and nervous pain that rendered me helpless. All physicians did for me was to advise keeping quiet. In August last I commenced taking Dr. Miles' New Heart Cure, and before I had finished the first bottle I found the medicine was a God-send. I have now used four bottles in all and am feeling entirely well. I am 73 years of age and have held a grade against patent medicines all my life, but I will not allow this to prevent giving my testimony to the great cure your valuable remedy has wrought in me. I do this to show my appreciation of Dr. Miles' New Heart Cure. S. O. STONE.
Dr. Miles Heart Cure is sold on a positive guarantee that the first bottle will benefit. All druggists sell it at 60c. per bottle, or \$5.00 it will be sent, prepaid, on receipt of price by the Dr. Miles Medical Co., Elkhart, Ind.
